Junior Software Developer with a strong foundation in web development and a passion for continuous learning. Completed Just IT's Digital Skills Boot Camp and gained hands-on experience with HTML, CSS, JavaScript, Python, and MySQL. Proactively expanded skills in modern frameworks including React, TypeScript, Tailwind CSS, Node.js, Next.js, and API integration. Practical experience from a developer internship at 2 Toucans, contributing to real-world projects using Drupal, PHP, Docker, and Linux. Quick to learn, team-oriented, and focused on building clean, user-focused solutions.

Tech Stack

- **Languages:** JavaScript, Python, PHP, TypeScript
- **Frontend:** React, Tailwind CSS, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Next.js, MySQL, MongoDB
- **CMS:** Drupal
- **Tools:** Git, Linux, Figma, API integration

Projects

1. Asteroid Game
- ❖ Designed and developed a classic arcade-style asteroid shooter game using HTML5 Canvas and vanilla JavaScript.
- ❖ **Implemented real-time animations, collision detection, score tracking, and responsive controls to create an engaging user experience.**
- ❖ **Link: [Asteroid Game](#)**

2. Weather App
- ❖ An app that provides current weather forecast information based on user-selected countries.
- ❖ **Built with HTML, CSS3, and integrated API for real-time data.**
- ❖ **Link: [Weather App](#)**

1. Fitness Website
- ❖ A web page designed to inspire people to start their fitness journey, showcasing different programs and classes.
- ❖ **Built using HTML and CSS.**
- ❖ **Link: [FitnessFit](#)**
